

Key Benefits of Trading on EEX

1. Emissions Spot Market Margining
 - No requirement for an upfront initial margin payment
 - Margin offsets are available between Carbon, European Power and Gas Markets
2. EUA as Collateral (Margin Credit) – EUAs can be used to reduce the initial margin requirements for:
 - EUA Spot Market (unrestricted number of certificates can be used)
 - EUA Derivatives Market (up to a covered net short-position in EUA futures)
3. Expiry dates & delivery times of EEX contracts are aligned with other exchanges
 - In addition: T+0 delivery possible via the same-day transfer service, regular T+1 request for transfer can be pre-dated to current day
4. Most competitive fee structure
5. Strong customer focus and personal assistance through account managers in London, Leipzig, Paris, Milan, Madrid, Chicago, Oslo.

About EEX

The European Energy Exchange (EEX) is the leading energy exchange in Europe which develops, operates and connects secure, liquid and transparent markets for energy and related products. As part of EEX Group, a group of companies serving international commodity markets, EEX offers contracts on Power, Emission Allowances as well as Freight and Agricultural Products. EEX is part of Deutsche Borse Group.

In August 2017, IncubEx and the European Energy Exchange (EEX) announced a partnership to build and improve liquidity in environmental and other related contracts. In this framework, the partners work to increase the number of active participants at the exchange and to create a global trading network. The cooperation involves existing environmental products and aims to continuously extend and improve the offering to clients.
